Security Gazette Index 1979

In its new, expanded form, this year's Index is designed so that it can, if you wish, be pulled out and kept as a separate reference booklet. It contains much more information aimed at ensuring that you can track items either via the subjects themselves or through the writers

Member of British Security Industry Association

- 24 hour monitoring of all detection loops
- Monitors for high and low resistance wiring
- 2 wires only for detection loops
- Accepts both n/o and n/c contacts and 24 hour (tamper) contacts
- Safe-set for exit/entry by both shunt lock and timer systems
- Eliminates false alarms during closing procedure
- Daytime indication of failing DC supply
- Individual indication of all active detectors on exit/entry route
- Engineer reset and alarm signal freeze
- Tamper proof channel setting
- Remote supervisory facilities
- Manufactured to BS4737 1977/78
- Rigid testing and burn-in under power prior to dispatch
- Complete flexibility for installation engineer

Giving the world a sense of security

The best security is backed by experience and training. There's no substitute.

No easy answers.

After 70 years in the business we've proved it, to our satisfaction, and that of our clients. That's how we became the largest security Group in Europe.

You see, our best advertisement is our people. They know their security. The ones you meet are the 5% that passed our screening and training programme. That makes them pretty special. So they make Group 4 special too.

Our training school is the finest in the country. People come from all over the world to train there.

Whether you need security guards, alarms, security in retailing or cash carrying, Group 4 give you a sense of security.

Get in touch with your local Group 4 office right now through Yellow Pages.

Protecting the priceless...

The Diamond Safe is the most powerful safe in the John Tann range. It has a substantially thicker door and body than its nearest rival and full protection over the *whole* of the door.

Not many of these incomparable units are built in the course of a year. They are not in regular production – each safe is individually created with supreme patience and skill. No refinement in security engineering technology is omitted, from massive shell construction and extra slabs of specially cast alloys, to sensitive devices actuated automatically by assault.

Price is not mentioned in the designer's terms of reference, for this safe is designed to protect the priceless.

Of necessity the price is high but the last word in security value is provided. The safe resists every form of criminal attack ever employed, and some not yet used.

The Diamond Safe is available in two sizes. Full information will be given to authorised enquirers.

Established since 1795

At 3a.m. Cardentry suddenly seems a good idea

Who's trying to get in? And if they succeed who'll have to stop them?

At any time of night—or day—the only people to gain access to sensitive areas should be those who are supposed to.

Industrial premises, offices, computer rooms and warehouses even when thoroughly patrolled are all at risk.

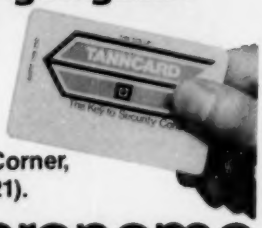
Cardentry Access Control will grant entrance selectivity and deny access to others at all times. Totally.

Based on a simple plastic card carrying an invisible code the system can be tailored to every situation.

It's the most advanced weapon in the security guard's armoury.

And at 3am it's nice to know you're not the only one on duty.

Your biggest ally in the fight against crime - Access Control with Cardentry.



Tann Synchronome Limited, Access Control Division, Stirling Corner, Borehamwood, Herts. (01-953 2021).

STOP BOOK THEFTS with our NEW EIGHTIES SYSTEM.

1. Designed to give full protection to book stocks and collections of other valuable items.
2. With our NEW EIGHTIES SYSTEM false alarms are minimal and Library staff can question patrons with confidence.
3. Suitable for all Libraries, whether Public or College.
4. Safe to use with no harmful effect on heart pacemakers etc.
5. The EIGHTIES SYSTEM is, in our opinion, the best and most effective available today, at a cost easily met by any Library.

Why not have our NEW EIGHTIES SYSTEM installed NOW and SAVE MONEY for spending in other ways.
